

# ***New Moon Meditation and Solar Eclipse Celebration at Yoga Central***

***1123 Jackson Boulevard, Houston, Texas 77006***

***Sunday, May 20th 6:30pm-8:30pm***

***This month we have a special opportunity of gathering at the precise time of the new moon in Gemini, immediately followed by the first annular solar eclipse visible in the United States in 18 years!***

***For this new moon in Gemini, we'll investigate the deeper meaning of the symbolic Gemini twins as our active outer person that everyone sees and the silent being that we are, our inner True Self. We'll practice gentle yoga and meditation techniques to awaken the upper chakras so we can listen deeply to our intuition, and identify and understand the messages from the Universe. We'll also have healing sound vibrations from the gong and crystal bowls. After the meditation, we'll celebrate the powerful solar eclipse and have a rare and special view of the eclipse (in Houston, it will be a partial eclipse).***
